A little bit about us...

iCyberSecurity is a well established company that offers cyber security at all different levels – from common households, to multi-million dollar companies. Our dream is to create a world in which everyone can feel comfortable, safe, and secure in reality as well as the ever growing virtual world.

Our History...

In order to understand how to protect from virtual attacks, one must first understand how to attack. Odd as it may seem, our company started as a small group of friends who were hackers. In fact, we were some of the most notorious hackers on the West Coast. Inevitably, we drew the attention of the Government, but instead of putting us behind bars, they asked for our help with cyber attacks from foreign countries. For, who can protect better than those who created the system of attacking in the first place? Upon our victory against foreign attacks, we were given two options– jail, or start fresh as a protection agency. And so here we are, iCyberSecurity, the best group of hackers in the world are at your service.

We Guarantee 100% satisfaction.

If our product fails to provide the utmost cyber security, or fails to satisfy and fulfill customer needs– customers are entitled to a full refund with no questions asked.

Sales Pitch

HouseHold Security			Business Security		
Common	Premium	Platinum	Small Business	Medium Business	Large Corporation
\$50.00/year	\$100.00/year	\$150.00/year	\$5,000/year	\$10,000/year	\$50,000/year
For the common household. Will be provided with a powerful firewall that auto-detects foreign attacks on your system. Comes with a required two part authenticator.
